-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 7, 8, and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Notar et al. Notar et al discloses a dispenser having a cold source 10, a carbonator 1, water level sensor 13, and an access space on one side of the dispenser through which the sensor is accessible.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Notar et al. Notar et al discloses the claimed invention except for the side of the dispenser on which the sensor and dispensing mechanism are located. The arrangement of the sensor and dispensing mechanism is considered to be a matter of obvious choice, because no criticality or unexpected results are seen or have been disclosed for the recitation of the sensor being located on the same side as where the beverages are dispensed.

5. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Notar et al in view of Cragun. Notar et al discloses the claimed invention except for the

pre-carbonation and post-carbonation chilling circuits. Cragun teaches a carbonation system including pre-carbonation and post-carbonation chilling circuits. It would be obvious to provide Notar et al with pre- and post-carbonation chilling circuits, in view of Cragun, for the purpose of providing additional cooling capacity to the carbonator.

6. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Notar et al in view of Hassell et al. Notar et al discloses the claimed invention except for the cold plate. Hassell et al teaches a carbonator which uses a cold plate. It would be obvious to substitute, for the cold source 10 of Notar et al, a cold plate of the type taught in Hassell et al, for the purpose of using a cold source that is easy to manufacture.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William E. Tapolcai whose telephone number is (703) 308-2640. The examiner can normally be reached on Mon. - Thurs., 6:30 to 5.
